**Subject:** Laminar flow visualization

Hello, Johann,

We are getting ready to leave for Holland, and I wanted to confirm the following issues.

1. Did you review the protocol that Gary Hansen sent? Do we have agreement with Hybeta?
2. Did our case of equipment arrive?
3. Do you have all the equipment that we need to conduct the testing: Bair Hugger warming unit, blankets, drapes?
4. We have not received a written protocol from Hybeta yet. Would you please send a copy for us to review?
5. In Holland, are most surgical patients positioned with their arms next to their body, or are the arms placed away from the body?

Thanks,

Al
